CENTER MESSAGE

In a new year in which we really aspire to return the pace of our lives to its first course and enable humanity to control the emerging corona pandemic, we provide to all of you a positive change in our training services that is in line with the requirements of the stage. This change will enable us to effectively continue the process of training and capacity building, in addition to preserving your safety and the safety of our communities from injury.

Therefore, the training plan for the year 2021 adopted the electronic training (ONLINE) system for all courses and workshops at a percentage of 100% with the possibility of providing direct training service (ONSITE) in the event of special request by our esteemed clients. This service is provided in accordance with the health requirements declared by the World Health Organization and the Sudanese Ministry of Health.

The process of training and learning is a continuous and lasting process for what remains of life, and is considered a fundamental pillar in building nations and their civilizations. With the advent of the new year, we also renew our commitment to actively contribute to advancing the building of our society, and we always strive to keep pace with the requirements of the stage and provide the best for our people and all of humanity.
